A DEEP DIVE INTO ESOGETIC COLORPUNCTURE

"Light is life. Specifically, light is present in the communication between cells in the body; illness occurs when the cells can no longer speak the same language."

— PETER MANDEL, FOUNDER OF ESOGETIC COLORPUNCTURE

What is Esogetic Colorpuncture?

Esogetic Colorpuncture is the most advanced and rapidly evolving medicine of light available today. It combines the ancient esoteric principles of the Hermetic Doctrines, the energetic wisdom of Chinese medicine, and modern scientific knowledge of light biophysics to form a powerful healing system.

Colorpuncture involves colored light, infrared frequencies, ultraviolet frequencies, and soul spirit crystal treatments to gently unlock and release emotional trauma and energetic blocks which often underlie our illnesses. The light or soul spirit crystals are placed on pre-determined zones on the skin to energize powerful healing impulses in our physical and energy bodies. As the therapeutic frequency is absorbed by the skin and transmitted along energetic pathways or meridians deep into the body, it stimulates intra-cellular communication and healing.

Colorpuncture treatments offer a unique new way to get to the very roots of many health problems. If you are ill or suspect your bodily symptoms may be related to old traumas or unresolved emotional issues, or to your confusion or lack of direction in life, Colorpuncture can help you access and heal the roots of your problems. Healthy people who want to help prevent illness by clearing energetic interferences before they impact the body, as well as those who want access to soul information needed to move more easily on their life paths, will find Colorpuncture treatments invaluable.

Soul Spirit Crystal Therapies

The soul spirit crystals, as developed by Dr. Peter Mandel, are highly sophisticated crystals enhanced by cut or engraved holographic primary patterns of the earth's hologram. This hologram is believed to correspond to the intrinsic human body-related information patterns. The crystals can show us the way back to harmony and well-being, and are an extraordinary life elixir — a "mini-vacation" to relax and to increase the general sense of well-being.
